Subject: Microsoft Settlement

Ladies and Gentlemen,

I think this foolishness has gone far enough, too far in fact. If you can't see that these lingering nine states are in "it" strictly for the money than I have a bridge I want to sell you after this foolishness is concluded.

We cannot control the success of one company, i.e. Microsoft, and the failures of others by taking money from the successful one and giving it to the slackers in an attempt to even the playing field. This is absolutely stupid, and My Government must act more intelligently than that.

This entire "suit" thing (designed by the previous Clinton Administration who when faced with what to do and had no intelligent way to turn, sued) makes me sick. Wake up Justice Department!!!!!!
